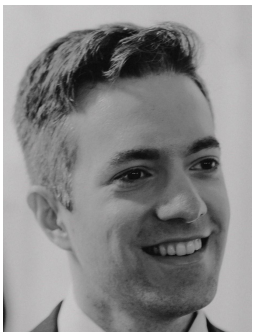
Matthias Hutter

Senior Software Architect | Infrastruktur und Finanzdaten-Systeme



Adresse:	Bruno-Marek-Allee 10/64, 1020 Wien
Telefon:	+43 650 8223546
E-Mail:	hutter.matthias@gmail.com
GitHub:	github.com/ScepticMatt
LinkedIn:	linkedin.com/in/matthias-hutter-7837349a

Persönliche Daten

Geburtsdatum:	27.08.1989
Staatsangehörigkeit:	Österreich
Wohnort:	Wien, Österreich

Kurzprofil

- Senior Software Architect und Infrastrukturverantwortlicher mit 8+ Jahren Erfahrung in FinTech- und Digital-Asset-Umgebungen.
- End-to-End-Verantwortung von Architektur und Umsetzung bis zu CI/CD, Monitoring, Incident Response und stabilem Produktionsbetrieb.
- Fundierte Erfahrung in auditierbaren Finanzdaten-Pipelines und Reporting (NAV, Balance, PnL) für regulierte Handelsprozesse.
- Hands-on-Führungserfahrung in Recruiting, Mentoring und teamübergreifender Delivery in verteilten und internationalen Teams.

Berufserfahrung

Director of Infrastructure Jan 2022 – Mär 2026
Dark Forest Limited (inkl. vorheriger Rolle bei Dark Forest GmbH) *Wien / Remote*

- Führung von Infrastruktur-Architektur und Automatisierung vom Unternehmensaufbau bis zum regulierten Electronic-Trading-Betrieb.
- Aufbau und Betrieb einer Validator-Landschaft über ~20 PoS-Netzwerke (~60 Validatoren) auf Cloud- und Bare-Metal-Infrastruktur.
- Konzeption und Umsetzung des Accounting Data Managers (ADM) als auditierbare Golden Source aus 10 Exchange-Feeds und internen Metadaten.
- Etablierung von automatisiertem NAV-, Balance- und PnL-Reporting via API, Dashboard, E-Mail, Slack und Excel.
- Entwicklung interner Services für Blockchain- und Marktdaten zur Unterstützung von Trading und Reporting.

Technologien: Node.js, TypeScript, Python, Java, OpenAPI, PostgreSQL, kdb+, AWS, OVH, Terraform, Ansible, Kafka, RabbitMQ, Prometheus, React, Keycloak

Lead Technical Architect / Backend Team Lead Sep 2017 – Dez 2022
Kivu Technologies *Wien*

- Entwicklung vom Backend Developer zum Team Lead und später zum Lead Technical Architect; in der Übergangsphase 2022 während des Wechsels zu Dark Forest geringfügig weitergeführt.
- Leitung einer umfassenden Modernisierung von Legacy-Systemen in Richtung bi-temporaler Time-Series-Graph-Architektur.
- Entwurf von Datenmodellen, Graph-Komponenten und automatisierten Datenpipelines für Enterprise-Integrationen.
- Verantwortung für Backend-Roadmap, Recruiting, Mentoring und Delivery in enger Abstimmung mit Produkt, QA und Kunden.

Technologien: Java, Vert.x, Spring, PostgreSQL, MySQL, Redis, RocksDB, Lucene, Jenkins

University Tutor (Computer Science) Jan 2016 – Mär 2017
URACCAN *Nicaragua*

- Unterricht in Algorithmen, Komplexität und Programmierung in C.
- Betreuung von Lehramtspraktika und Unterstützung der Studienprogramme.

Technische Kenntnisse

Kernkompetenzen: Plattform-Architektur, Backend-Engineering, Finanzdaten-Systeme, Infrastruktur-Automatisierung, Teamführung
Programmiersprachen: TypeScript, Java, Python, C/C++, JavaScript, SQL
Backend und APIs: Node.js, Express, Vert.x, Spring, REST, OpenAPI, RabbitMQ, Kafka
Daten und Storage: PostgreSQL, MySQL, Redis, RocksDB, Apache Lucene, kdb+
Infrastruktur und Betrieb: AWS, Linux, Terraform, Ansible, Docker, CI/CD, GitHub Actions
Monitoring und Identity: Prometheus, Alertmanager, Grafana, OIDC, RBAC, Keycloak

Ausbildung

Studium (ohne Abschluss): Electronics Engineering 2011 – 2014
Swiss Federal Institute of Technology (ETH Zurich)

Studium (ohne Abschluss): Physik 2008 – 2011
Swiss Federal Institute of Technology (ETH Zurich)

Elektrotechnik-Lehre + Matura 2003 – 2008
Werkschulheim Felbertal

DARKFRST

DarkForest Limited
Buckenhof, Germany, February 5, 2026

To Whom It May Concern,

I am pleased to recommend Matthias Hutter, with whom I worked closely at DarkForest Limited during his tenure as Director of Infrastructure.

Matthias is a rare combination of technical depth, reliability, and leadership maturity. He takes full ownership from problem definition through delivery and operational stability, even when the initial situation is unclear or poorly documented.

During our collaboration, I saw Matthias repeatedly:

- Translate complex, ambiguous infrastructure and data problems into clear execution plans.
- Deliver production-grade systems for financial and operational reporting with strong quality and auditability standards.
- Coordinate effectively across engineering and non-engineering stakeholders, keeping priorities aligned and execution predictable.
- Help teams handle pressure constructively through patient communication, thoughtful planning, and strong follow-through.

One of Matthias' strongest qualities is that he improves team performance around him. He builds trust, de-escalates cross-team friction, and keeps people focused on outcomes without sacrificing technical standards.

Matthias is leaving due to liquidation of DarkForest Limited and not because of performance concerns.

I recommend him strongly for senior engineering and technical leadership positions, especially where reliability, cross-functional collaboration, and independent problem solving are critical. I would not hesitate to work with him again.

Please feel free to contact me at philipp@bluemarble.io for additional information.

Sincerely,

Philipp Rosenhaeger
Director and Shareholder, DarkForest Limited

DarkForest Limited

New York, NY, United States

February 5, 2026

To Whom It May Concern,

I am writing to recommend Matthias Hutter, who worked with me at DarkForest Limited as Director of Infrastructure from September 2021 to January 2026.

In this role, Matthias combined senior architectural judgment with strong hands-on execution. He owned infrastructure design and operations for a regulated electronic trading environment spanning cloud and bare-metal systems. More importantly he was always responsive, responsible, and professional – delivering his work with the prudence and timeliness required from a tier-1 financial institution

Selected contributions include:

- Designed and operated validator infrastructure across approximately 20 PoS networks and around 60 validators, with high reliability expectations.

- Built the Accounting Data Manager (ADM), consolidating approximately 10 exchange feeds and internal metadata into an auditable “golden-source” dataset.

- Implemented automated NAV, balance, and PnL reporting workflows used across API, dashboard, Slack/email, and spreadsheet-based operational processes.

Matthias is a highly effective problem solver. He routinely delivered in areas with incomplete documentation and unfamiliar technical scope by investigating quickly, structuring risks, and delivering practical solutions from testing to production.

Please contact me at matthewarrow@protonmail.com for any further information.

Sincerely,

Matthew Arrow

Co-Founder and CEO, DarkForest Limited
